

## Listen to this site

You can listen to the contents of Swindon Home Bid website being read aloud to you. You can access this service by downloading a free piece of software, called a plug-in, from Browsealoud.

It may be helpful to:

- people who do not speak English as their first language
- anyone with low literacy skills or Dyslexia
- people with mild visual impairments
- anyone who would prefer to listen to text rather than read it

Click on the logo to download the free Browsealoud software on your computer which will let you hear the text on our site as well as other Browsealoud-enabled sites as spoken word.

## How does it work?

Once you have downloaded the plug-in, the Browsealoud icon will appear in your system tray, which is usually found in the bottom right-hand corner of your screen.

When you move your cursor over text, the relevant sentence is spoken aloud. You can choose to listen to selected sections of text or the entire page from where your cursor is pointed. There is also an option to see the words that are being spoken in large size at the top of the screen.

To customise your Browsealoud settings, right click on the icon once it is installed on your computer and choose 'Open Browsealoud settings' from the menu.

[Go to the Browsealoud Video Tour for further information](#)
